

THE MISSOURI SOCIETY OF RADIOLOGIC TECHNOLOGISTS

First District Report January 21, 2012

First district is in full swing planning our next conference to be held March 24, 2012. We will hold this conference back where we started, which is Heartland Regional Medical Center in St. Joseph, Missouri. Our agenda is set with eight credits offered for the price of \$25.00. We are receiving a ton of support from the hospital plus 2-3 vendors. We will be able to provide two credits for Mammography with the remainder of lectures to include care of the trauma cervical spine; how Radiology plays a major role in the care of the trauma patient; plus one of our Radiologists will speak on MRI of the breast. MSRT district 1 officers are looking forward to a very informative conference.

Our next conference will be our annual two-day fall conference to be held in September 2012. Keep watching the website for more information.

A thank you to all officers and committee members who continue to pour their efforts and many hours of time into helping our conferences be as successful as they are. We have a great group of technologist, who are happy to help promote the cause.

Respectfully submitted,

Diane Hutton,

MSRT District 1 representative.
